

Check out Ritz-Carlton Residences, Sunny Isles' new sales gallery

Estimated for completion in 2018

The Ritz-Carlton Residences, Sunny Isles launched their gorgeous sales gallery recently across the street from its upcoming 52-story beachfront development that **broke ground last summer**.

Facing the Atlantic Ocean and located at 15800 Collins Avenue, the pristine space offers rooms modeling the living areas in the residences, including a model kitchen, living room, and bathroom, in addition to a 6.5-foot scale model of the Arquitectonica-designed development.

“The launch of this sales gallery is another exciting milestone for The Ritz-Carlton Residences, Sunny Isles Beach and our project’s recognition among sophisticated buyers worldwide,” said Edgardo Defortuna, CEO of Fortune International Group. “When you couple the distinction of The Ritz-Carlton brand with such an unparalleled location, the draw is unmistakable.”

The project with the **sexiest exterior penthouse rendering** in the land—the top-floor residence sold for **\$16.5 million in May**—is a collaboration between Fortune International Group and Château Group.

Completion is expected towards the end of 2018.
